

# B4B Timber

Product catalogue

**B4B OÜ** is a timber products supplier founded in Estonia in 2003. We are specialized in timber products such as construction timber, wood based panels, furniture components, wooden house framing, machine rounded posts.

The company ensures the delivery of goods to clients' warehouse, deals with logistics and customs clearance procedures.

We value the opportunity of selling such a natural and environmentally-friendly material as wood. High quality, precision, reliability along with proactive approach to work are the qualities our partners choose us for. We help our clients save their time on purchasing materials, provide them with the possibility to focus on the main things. We value our products and proactive relations.

Our name stands for consistent high quality and on-time delivery. Based on the strength of our flexibility and proper performance, our goal is to be a part of your production process on a long-term basis and to serve you as a successful supplier.

#### Packaging:

With five- sided plastic packaging

#### Raw materials:

The base of raw materials to B4B product program is supplied from Russian well- managed forests.

#### Other:

Please contact us for additional information.

# Siberian larch

## Sawn Wood

**B4B** offers standard boards of Siberian larch (*Larix sibirica*). This wood grows during short summers and long, cold winters. The results are very close annual rings, which gives this valuable material particularly resistant properties, high strength and it is excellent for subsequent finishing. Edged boards from Siberian larch are in great demand in the market of building materials and are suitable for both exterior and interior works.

## Specification

Dimensions:	100 mm	125 mm	150 mm	175 mm	200 mm	225 mm
25 mm	•	•	•			
32 mm			•	•	•	
38 mm		•	•	•	•	•
